

First 2009 Meeting

A great start to a New Year!! Allen Felker of DREAMATIONS VIDEO PRODUCTIONS demonstrated ***Pinnacle Ver.12*** to a very interested group of members. He made it look very easy, but had obviously spent many hours to gain his level of skill.

Basically, he showed how to take a number of still images from any source and develop your own video presentation. In his program were excellent title frames to embellish the scene and good ending frames to complete the presentation. Audio of music was available and such music was able to match the elapsed time of the video to ensure a smooth effect. On the Pinnacle website where many extra sets of frames and music to fit in with the theme being developed – all at an extra cost of course!!

The time went by very quickly with several members asking questions which led to further tools within the program being shown. Altogether, a very good evening and Steve Wawrykow expressed our thanks to Allen for his efforts.
