

June Meeting 2007

Kelly Etheridge from the Harbor City Photography Club gave an entertaining and informative presentation on the use of PhotoShop CS2 to make photo collages.

Kelly is also a professional photographer and demonstrated some of the work she produces for her clients with a slide show she produced with **ProShow**.

ProShow is available for a 15 day trial at the link below.

<http://www.photodex.com/products/proshow/>

Note – the photos in this report were taken in a darkened room using a Olympus digital SLR camera and touched up in PhotoShop.

Kelly then enthusiastically proceeded to show us how she made collages in PhotoShop and gave many tips on the use of PhotoShop. Before we all were ready, our time was up. Time flies when you're having fun. Thanks Kelly for a great presentation.
