

## **FIRST MEETING ON JANUARY 3<sup>RD</sup> 2008**

A great evening for our first meeting of 2008!! Gary Korpan was in good form and kept the interest on a high level. He said rather than our taking notes, he will send a summary by e-mail of the various programs he reviewed during the evening– he did say they were all "FREE", which captured our interest immediately. The many utilities he showed us covered all sorts of tasks in computer usage and his comments filled in many details. There was a good turnout, and the members present participated with lots of questions that had Gary working pretty hard!!

In the second half of his program, Gary showed some of the incredible images he had downloaded from the many satellites and telescopes in the heavens. Together with his commentary describing what we were seeing, it was difficult to believe the beauty and colours we were viewing.

At the end of the presentation, Gary was given a grateful and enthusiastic round of applause for his efforts.
