

Skype Presentation

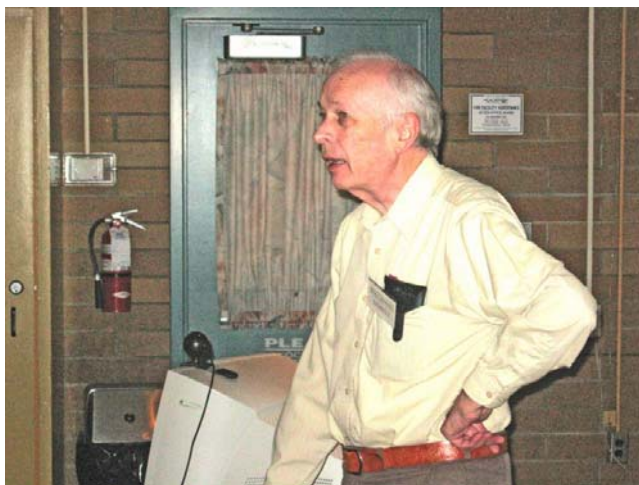

Nov. 1rst 2007

Cliff Farmer and Niels Jorgensen gave an outstanding presentation on using Skype as a computer based telephone and an audio-visual communication device.

One needs at least a microphone (headset preferred) or a webcam to talk directly to others. Use this link to try Skype. <http://www.skype.com/intl/en/>

Do not go to a website that offers Skype for a one-time fee. **It is not necessary!** Some people do anything to get your money. For more information, check out the Skype site.
